Workshop 2	<p>Innovative and Legal Considerations for Voluntary Self-Identification <i>Scott Kelly and Nonnie Shivers, Ogletree Deakins</i> Does your organization struggle with responses to voluntary self-identification efforts? Society is changing. Younger generations are adding to number of “Do Not Wish to Disclose” responses which complicate effective compliance and DEIA initiatives. Has your organization grappled with providing an inclusive experience and environment and being limited by the current categories that are used for AAP and EEO-1 compliance purposes? In this session we discuss the legal and practical implications of an effective voluntary self-identification program. Join us to learn how to weigh the benefits of inclusive practices versus legal risks.</p>
Workshop 3	<p>The Internet Applicant Rule and Beyond: Data Refinement Strategies <i>Christopher Patrick and Michelle Duncan, Jackson Lewis P.C.</i> This session will move beyond the four corners of the Internet Applicant Rule and explore topics such as ensuring proper applicant pool definition, treatment of rehires, internal applicants and selections (e.g. promotions/transfers), exploration of alternative statistical methodologies, and the like. The robust and interactive discussion of data refining concepts will empower attendees to engage in new ways of thinking about using data in hiring discrimination investigations and proactive, self-critical analysis. Participants will learn:</p> <ul style="list-style-type: none"> • How OFCCP investigates hiring discrimination • Advanced application of the Internet Applicant Rule • Strategic approaches beyond the Internet Applicant Rule to refine applicant and hires data in an OFCCP audit

(EASI)</i> The U.S. Department of Labor is expected to finalize its updated independent contractor rule sometime in 2023, which will likely make it harder for employers to label workers as independent contractors, resulting in millions of workers gaining employee status. Such a change will have significant ripple effects throughout the workplace compliance landscape, including OFCCP reporting, recordkeeping, monitoring, and other regulatory requirements. In this session, we’ll discuss the impact of a new independent contractor rule on OFCCP and other employee-related compliance obligations.</p>

Failure to do so can result in longer, more expensive audits and potential unnecessary adverse findings or enforcement proceedings. Attendees will learn about: (1) the legal authority and limitations for OFCCP RFIs; (2) common OFCCP RFIs; and (3) practical tips for mitigating risk and burden when responding to RFIs.</p>
<p>Workshop 4</p>	<p>Artificial Intelligence in the Human Resources Department: Legal Risks <i>Daniel Butler, Hunton Andrews Kurth LLP</i> Artificial intelligence is creeping into many facets of human life. Often employers take a purely reactive approach to reasonable accommodations, offering little in the way of assistance to employees unless the employee specifically asks for an accommodation. This interactive program will explore how workplace wellness programs can transform this "we'll cross that bridge if we get there" environment by offering opportunities for employees to confidentially seek assistance through effectively structured wellness programs.</p>

Workshop 3	<p>Strategies for Documenting Annual Affirmative Action Initiatives <i>Joshua Roffman and Alissa Horvitz, Roffman Horvitz, PLC</i></p> <p>As OFCCP places increased emphasis on documentation, many employers are struggling to understand what that documentation looks like. For example, OFCCP expects employers to develop action-oriented programs based on the results of the data analyses in the women and minorities AAP; review personnel process, assess outreach effectiveness, and engage in external and internal dissemination pursuant to the veteran and disability regulations; and conduct an internal audit under all three sets of regulations. This session will address (1) what that follow-through looks like; (2) what records the employer should generate; and (3) which records might be best created at the advice of counsel to preserve attorney client privilege.</p>
Workshop 4	<p>Using AI in Hiring; Understanding Compliance <i>Angela Hood, ThisWay Global; Ryan Hagemann, IBM</i></p> <p>The AI Bias Law is the first of its kind and has the potential to set a rudimentary foundation for what’s to come. Some experts beg to differ, while others believe it doesn’t hold enough weight. As of right now, there aren’t any formally enforced regulations or laws to govern companies and employers using artificial intelligence in HR. Without clearly defined guidelines to fall back on, the possibility of AI bias in HR technology increases. It may not be in the midst of perfection, but it is the first to ensure transparency. Let’s delve into what the AI Bias Law is and what it means for the future of AI in Human Resources.</p>
